

STIC EIC 2100 111932 Search Request Form (39)

Today's Date: 1/12/04

What date would you like to use to limit the search?

Priority Date: 10/26/00 Other:

Name THU HA NGUYEN

AU 2155 Examiner # 77580

Room # CPK2-5A08 Phone 305-7447

Serial # 09/696, 752

Format for Search Results (Circle One):

PAPER DISK EMAIL

Where have you searched so far?

USP DWPI EPO JPO ACM IBM TDB

IEEE INSPEC SPI Other _____

Is this a "Fast & Focused" Search Request? (Circle One) YES NO

A "Fast & Focused" Search is completed in 2-3 hours (maximum). The search must be on a very specific topic and meet certain criteria. The criteria are posted in EIC2100 and on the EIC2100 NPL Web Page at <http://ptoweb/patents/stic/stic-tc2100.htm>.

What is the topic, novelty, motivation, utility, or other specific details defining the desired focus of this search? Please include the concepts, synonyms, keywords, acronyms, definitions, strategies, and anything else that helps to describe the topic. Please attach a copy of the abstract, background, brief summary, pertinent claims and any citations of relevant art you have found.

A system & method to enforce a policy in a multi-computer service application having a plurality of software modules that execute on a plurality of computers, the multi-computer service application further having access to a communications medium that allows data communications between different ones of the computer: A logical module of the multi-computer service application having models component representing logical function of application; A core runtime converter to create one or more module instances of the model components to implement logical functions; One of the module instances being a ~~logical~~ policy module, logical input/output ports (see claims 23 and specification); The policy module is configured to receive event notification from a module instance, and in response to an event notification the module instance configured to: determine a

STIC Searcher Geoffrey St-Leger Phone 308-7800

Date picked up 1/12/4 Date Completed 1/21/4

Request for 1 or more destination module.

* Provide the request to an output port of the policy module. Output port forwards the request to input port of the plurality of modules.

Search Notes

Dear Examiner Nguyen,

Attached please find the results of your search request for application 09696752. I searched Dialog's foreign patent files, technical databases, product announcement files and general files.

Please let me know if you have any questions.

Regards,

Geoffrey St. Leger
